Dear Ellie,

In this writing, I would like to express my satisfaction with the tracking system provided to us by GPS Tracking Canada. The system has helped our company and drivers in different ways; The main feature of the system for us is the Hours of Service capability which allows our drivers to log their status in a hassle-free manner. The live tracking has also optimized the way we use our vehicles and we like the fact we can stay connected with our drivers through the system.

Overall, we are very happy with this technology and would recommend it to other users.

Thank you,

Kevin Jiricka
